

MOEX RUSSIA INDEX

a new name of the
Russian stock market
benchmark

The audit covered:

- ▶ FX Fixings, including the MOEX USD/RUB FX Fixing;
- ▶ families of equity indices;
- ▶ government and corporate bonds indices;
- ▶ pension indices;
- ▶ repo and swap rate indicators.

The report confirms the transparency of MOEX's index management procedures; the high quality of the Exchange's indicator generation, calculation, and disclosure processes; and the effectiveness of the Exchange's internal controls over the development, calculation and release of financial indicators and market benchmarks.

Exchange Update

In 2017, Moscow Exchange rolled out a new cloud-based service for accessing historical trading data from the Exchange's markets. It offers customised processing tools and graphical representations of the data and related analytical indicators.

Moscow Exchange also developed new principles for defining Non-Display Usage of the Exchange's market data and new pricing approaches for this type of data, reflected in new versions of the Moscow Exchange's Information Policy and Tariffs for its Information Services approved in 2017. These changes helped to further align the terms of using the Exchange's market data for traders and other clients benefitting from the Exchange's information services.
